Project Title Hunaha Park

Area Impacted by Project (Community) county, watershed) _____

Project Type (check one)

☒ Communities and Infrastructure ☐ Other ☐ Ecosystem Investment

Amount Requested from Initiatives: \$ 300,000

Total Estimated Project Cost: \$ 300,000

Private investors will be solicited to supplement the public dollars.

Matching Funds and Sources: \$ 60,000

Preconstruction

Sources

1. Briefly describe your project.

Develop overnight camping facility on Grande Ronde River and raft launch and parking area.

2. What problem/need/strategy does this project address? If this is an Ecosystem Investment project, is it for habitat or wildlife restoration or water quality enhancement?

Economic Development Tourism Strategy.

3. Is this project part of any local plan or watershed analysis? If so, what plan or analysis?

Elgin Strategic Plan, Elgin Zoning and Landuse Plan, Un Co Strategic Plan.

4. Summarize efforts your jurisdiction has taken to date regarding this project in terms of (A) planning efforts; (B) engineering and feasibility reports; (C) identifying potential funding, including local sources; (D) environmental assessments; or (E) other efforts unique to this project

Funds have been procured to provide engineering design. Feasibility study and planning completed.

5. When would you be ready to start on this project and how long would it take to accomplish?

Ready to start on August 1997

Time to complete 6 Mo - 9 Mo

6. Are other projects related to this project: ☒ Yes ☐ No

If yes, what projects are related?

River restoration along river frontage---
Interpretive trails along river.

7. How will this project help communities, workers and families, and businesses adjust and thrive in the face of reduced timber harvests, i.e. (A) number and duration of jobs (especially for dislocated workers and their family members); (B) acres/miles of habitat and targeted species enhancement; or ☒ local capacity/infrastructure?

Provide overnight facilities for tourists; provide the foundation for development of tourism strategy.

8. What other investments, if any, are needed to achieve these benefits?

9. Are there other factors significant to this project that we should be aware of?

Dove-tailing the park development with water shed restoration as appropriate.

10. What measures of success will you use to evaluate this project?

Most immediately will be the # of overnight stays. Secondary will be the increased retail sales due to visitors to the community.

Project Title Elgin Industrial Park/Incubator

Area Impacted by Project (community, county, watershed) North County

Project Type (check one)

☐ Communities and Infrastructure ☒ Other ☐ Ecosystem Investment

Amount Requested from Initiatives: \$ 200,000

Total Estimated Project Cost: \$ 350,000

Matching Funds and Sources: \$ 150,000 Private
Sources

1. Briefly describe your project.

Purchase one of 3 sites (~3 Acres) to develop as an industrial park;
Construct an incubator facility.

2. What problem/need/strategy does this project address? If this is an Ecosystem Investment project, is it for habitat or wildlife restoration or water quality enhancement?

Job creation.

3. Is this project part of any local plan or watershed analysis? If so, what plan or analysis?

Elgin Strategic Plan/Un Co strategic Plan.

4. Summarize efforts your jurisdiction has taken to date regarding this project in terms of (A) planning efforts; (B) engineering and feasibility reports; (C) identifying potential funding, including local sources; (D) environmental assessments; or (E) other efforts unique to this project

One aborted attempt to identify large industrial site; redirected to secure and develop smaller site. One of 3 sites each with rail spur.

5. When would you be ready to start on this project and how long would it take to accomplish?

Ready to start on Now Time to complete 1 year

6. Are other projects related to this project: ☐ Yes ☐ No

If yes, what projects are related?

7. How will this project help communities, workers and families, and businesses adjust and thrive in the face of reduced timber harvests, i.e. (A) number and duration of jobs (especially for dislocated workers and their family members); (B) acres/miles of habitat and targeted species enhancement; or (C) local capacity/infrastructure?

Elgin has had numerous start up business and cottage industries. All have struggled to find adequate space. Developed site ready to build and available incubator will foster continued development of start-up/cottage business and facilitate expansion of existing small manufacturers.

8. What other investments, if any, are needed to achieve these benefits?

Infrastructure to support site; extension of water/sewer; power, gas.

9. Are there other factors significant to this project that we should be aware of?

10. What measures of success will you use to evaluate this project?

Successful growth of existing cottage/start-ups.

Project Title Elgin Sewer I & I

Area Impacted by Project (community, county, watershed) Community/Watershed

Project Type (check one)

☒ Communities and Infrastructure ☐ Other ☐ Ecosystem Investment

Amount Requested from Initiatives: \$ 100,000

Total Estimated Project Cost: \$ 100,000

Matching Funds and Sources: \$ _____
Sources

1. Briefly describe your project.

Correct sewer system inflow and infiltration of sewer collection system.

2. What problem/need/strategy does this project address? If this is an Ecosystem Investment project, is it for habitat or wildlife restoration or water quality enhancement?

Elgin has some excess sewer capacity for development and has recently upgraded treatment facility. However, during wet conditions I & I saturates the collection system and negates the excess capacity of the treatment facility.

3. Is this project part of any local plan or watershed analysis? If so, what plan or analysis?

Elgin Strategic Plan (infrastructure)

4. Summarize efforts your jurisdiction has taken to date regarding this project in terms of (A) planning efforts; (B) engineering and feasibility reports; (C) identifying potential funding, including local sources; (D) environmental assessments; or (E) other efforts unique to this project

The City has invested ~\$40,000 to reduce I & I and ~\$20,000 to identify the sources of I & I. It will spend an addition 25-30,000 this year to reduce I & I.

5. When would you be ready to start on this project and how long would it take to accomplish?

Ready to start on December 1997

Time to complete 6 Mo

6. Are other projects related to this project: ☐ Yes ☐ No

If yes, what projects are related?

7. How will this project help communities, workers and families, and businesses adjust and thrive in the face of reduced timber harvests, i.e. (A) number and duration of jobs (especially for dislocated workers and their family members); (B) acres/miles of habitat and targeted species enhancement; or ☒ local capacity/infrastructure?

Allow the excess treatment capacity to be used for additional development.

8. What other investments, if any, are needed to achieve these benefits?

9. Are there other factors significant to this project that we should be aware of?

Elgin is not meeting its discharge permit requirement during wet periods and on occasion spills raw sewage into Grande Ronde River.

10. What measures of success will you use to evaluate this project?

Reduced sewer flows.

Project Title Elgin Water Storage

Area Impacted by Project (community, county, watershed) _____

Project Type (check one)

☒ Communities and Infrastructure ☐ Other ☐ Ecosystem Investment

Amount Requested from Initiatives: \$ 300,000

Total Estimated Project Cost: \$ 600,000

Matching Funds and Sources: \$ 300,000 Loan
Sources

1. Briefly describe your project.

Construct water storage facility to provide modest storage and pressure regulation of low pressure side of water system.

2. What problem/need/strategy does this project address? If this is an Ecosystem Investment project, is it for habitat or wildlife restoration or water quality enhancement?

Infrastructure enhancement

3. Is this project part of any local plan or watershed analysis? If so, what plan or analysis?

Strategic plan (infrastructure)

4. Summarize efforts your jurisdiction has taken to date regarding this project in terms of (A) planning efforts; (B) engineering and feasibility reports; (C) identifying potential funding, including local sources; (D) environmental assessments; or (E) other efforts unique to this project

The City is installing an active electronic throttle system to regulate flow and pressure in the low pressure system.

5. When would you be ready to start on this project and how long would it take to accomplish?

Ready to start on 1998/1999

Time to complete ~ 6 MO

6. Are other projects related to this project: ☐ Yes ☐ No

If yes, what projects are related?

7. How will this project help communities, workers and families, and businesses adjust and thrive in the face of reduced timber harvests, i.e. (A) number and duration of jobs (especially for dislocated workers and their family members); (B) acres/miles of habitat and targeted species enhancement; or ☒ local capacity/infrastructure?

Provide security of water availability. To date, the storage system is dependent on only one of three wells. Having low pressure storage would allow any combination of supply wells to maintain water during repairs/maintenance.

8. What other investments, if any, are needed to achieve these benefits?

9. Are there other factors significant to this project that we should be aware of?

10. What measures of success will you use to evaluate this project?

Existence of operating storage
